

# Lightruss LED Gen 2 - New Construction

LRU12239 18.00 in

JOB NAME:

TYPE:

NOTES:

## DESCRIPTION

Lightruss LED Gen 2 eliminates the need for multiple power drops and electrical conduit.

The dual-rail truss system allows for multiple circuitry, switching, and emergency circuits. The stealth design of Lightruss nests the high-performance luminaires atop the railway system – providing full cut-off and eliminating direct glare all while delivering an impressive 127 lumens per watt. With our innovative indirect lighting system, you can achieve the light levels needed for your projects with less luminaires.

Bonus! Lightruss delivers the lumens and performance needed to meet the NCAA Best Lighting Practices for broadcasting swim/water polo matches.

For a complimentary lighting layout, contact our applications team at [SPIteam@spilighting.com](mailto:SPIteam@spilighting.com).

## FEATURES & BENEFITS

- Slim, streamlined design that blends into architecture
- Saves installation costs by significantly reducing the number of power drops, wires and conduit required
- True asymmetric optics with a deep forward throw
- Turn corners and change elevation to follow the contours of the space
- Glare-free light with full horizontal cutoff
- Fully engineered for natatoriums
- Handcrafted in USA

*Note: This spec sheet is for the fixture head only. Each fixture attaches to a dual rail truss system with self-supporting geometry. The dual rail truss system is supported by fabricated bulkheads which mount by either corrosion-resistant nickel alloy aircraft cables or stem. Contact factory for a full system layout.*

### Required Field \*

## A - LIGHT SOURCE \*

To ensure color consistency, SPI uses precise bin selection and strict quality processes to maintain a 3-step (MacAdam) SDCM on all white LED lampings. Published LED luminaire wattages are calculated using a typical power supply efficiency of 88%; exact wattages may vary based on application. Alternate wattages available upon request.
