5. Tivoli Lighting announces Vast Cove Light Palette for maximum control of architectural lighting in commercial, hospitality, museum and education settings. With multiple RGBW and CCT options available as well as DMX and RDM protocol, this IP52-rated, CE-, ETLus- and RoHS-listed solution delivers up to 900 lumens per ft and a 115-deg beam of light. It is available in 1- to 4-ft sections and features surface-mounting brackets with adjustable clips for easy installation in angled and curved spaces. www.tivolilighting.com

6. SPI Lighting announces Echo Expanse-Wall (Yoke) for indirect LED lighting in indoor applications. Advanced heat-sink technology allows asymmetrical beams of perimeter illumination to reach deeper into spaces, providing glare-free illumination for longer periods of time in high ambient heat temperatures. The natatorium option includes protection from humidity and chemical vapors. www.spilighting.com

SPOTLIGHT U.S. Architectural Lighting

U.S. Architectural Lighting introduces Tsunami 15 for area and roadway lighting. Dark-sky friendly with a Backlight, Uplight and Glare (BUG) rating of U0, Tsunami 15 is a low-profile luminaire with cast aluminum day-form housing as well as field-replaceable and field-rotatable optics with low-luminance lenses. This fixture can be configured up to 256 watts and deliver up to 30,000 lumens for 30-ft parking applications. For increased efficiency and long driver life, driver boxes and LED cast backplanes are housed in separate chambers to separate thermal sources into heat islands. Lamps are available in neutral-white, cool-white, warm-white and suitable-for-wildlife true-amber LEDs. www.usaltg.com
