Revit Model Installation Instructions

1. Install both the RFA file and the TXT file in the same file directory.
    Both files need to be located in the same file directory, with their current file names, for the embedded links to function properly.
    DO NOT SEPARATE OR RENAME THE FILES.

2. The photometric file in the RFA file is a generic placeholder.
    The user can substitute this generic file for the desired SPI Lighting photometric file.

3. Please visit www.spilighting.com to obtain our current photometric offering.
