### Design Notes

#### Translucent Panel Inserts

Sebring Compositions allows the incorporation of popular 3Form® Varia resin panels or Advent's unique hand-painted lenses as inserts into the window box. Light is projected from above and below, as well as from the front and rear, to bring out the color and texture of the material. Seven standard Compositions are offered, but the opportunity for customization is almost limitless. Most Varia series panels, as well as similar materials from other manufacturers can be used as modified standards.

**SEBRING COMPOSITIONS - Panel Inserts AIW1504 - 1508**

Sample Model Number: AIW1504-2F26-120-PT03-HP01-EMI

To build a model number for ordering: **START WITH**

**SPECIFICATIONS**

- Formed aluminum housing and face plate.
- Solid bar stock accent - 3/16" square.
- Fluorescent ballasts are integral and electronic.
- Mounts to a standard 4" octagonal junction box.

Dry or damp locations.

**HOUSING FINISHES**

- PT\_\_ Painted - include paint number
- BAL Brushed aluminum

**ACCENT FINISHES**

- PT\_\_ Painted - include paint number
- BBR Brushed solid brass
- PBR Polished solid brass
- CPBR Chrome-plated polished brass

**OPTIONS**

- EMI Integral Emergency Battery Pack
- TL Top lens, clear prismatic polycarbonate lens.
- BL Bottom lens, clear prismatic polycarbonate lens.

**PANEL FINISHES**

- HP01 Hand painted lens, Silver
- HP02 Hand painted lens, Beige
- HP03 Hand painted lens, Amber
- TPBG Translucent Panel, Bear Grass
- TPCR Translucent Panel, Cirrus
- TPGT Translucent Panel, Ginko Thatch
- TPQM Translucent Panel, Quo Mezzo

**NOTE:** The swatches shown are printed representations of our standard panel inserts. Actual product finishes and materials may vary slightly from the samples shown here.

Consult factory for custom configurations.
