

IMPORTANT SAFETY AND INSTALLATION INSTRUCTIONS

WARNING: Risk of fire and electrical shock. This product is to be installed by a qualified electrician only.

CAUTION: When using electrical equipment, basic safety precautions should always be followed including the following: Read all instructions carefully before installation and save

for future use. Make sure installation and all connections are in accordance with National Electrical Code and any local regulations. To avoid possible electrical shock, be sure that power supply is turned off before installing or servicing this fixture. Servicing should be performed by qualified service personnel.

These instructions do not claim to cover all details or variations. When additional information is desired, please contact your SPI representative.

LIGHTRUSS RAIL

Installation Instructions:

1. After hanging the support rail, remove the white wire access cover.
2. Hold the fixture over the extrusion in the desired location.
3. Lower the fixture down to the extrusion hooking one side and allowing the other to rest against the extrusion.
4. Within the fixture area, splice into the main feed wires using the provided 5-lever wire nuts.
5. Carefully tuck the wires in the extrusion.
6. Place the fixture cover down over the power supply.
7. Secure the cover using the provided flat head screw.
8. After hanging all of the fixtures, cut the white access cover to fit between fixtures and snap in place.
