

# IMPORTANT SAFETY AND INSTALLATION INSTRUCTIONS

**WARNING:** Risk of fire and electric shock. This product is to be installed by a qualified electrician only.

**CAUTION:** When using electrical equipment, basic safety precautions should always be followed including the following: Read all instructions carefully before installation and save

for future use. Make sure installation and all connections are in accordance with National Electrical Code and any local regulations. To avoid possible electrical shock, be sure that power supply is turned off before installing or servicing this fixture. Servicing should be performed by qualified service personnel.

These instructions do not claim to cover all details or variations. When additional information is desired, please contact your SPI representative.

## WIRE GUARD-LAMP SHIELD INSTALLATION

FIGURE 10

Lamp Shield Option: Figure 10, remove protective film from Lamp Shield then slide it over Lens Retain Bolt before Safety Cable from lens. Secure shield and cable with 1/2" Hex Nut, wrench tight.

FIGURE 11

FIGURE 12

Wire Guard Installation: Figure 11, thread 1/4" Hex Head Screw into Wire Guard as shown. Tighten screw to close wire guard so it will fit over Fixture Housing Lip (Figure 12). Place the (2) large diameter rods on the wire guard so they sandwich the Fixture Housing Lip then tighten the screw to compress the guard around the housing.
