

IMPORTANT SAFETY AND INSTALLATION INSTRUCTIONS

WARNING: Risk of fire and electrical shock. This product is to be installed by a qualified electrician only.

CAUTION: When using electrical equipment, basic safety precautions should always be followed including the following: Read all instructions carefully before installation and save

for future use. Make sure installation and all connections are in accordance with National Electrical Code and any local regulations. To avoid possible electrical shock, be sure that power supply is turned off before installing or servicing this fixture. Servicing should be performed by qualified service personnel.

These instructions do not claim to cover all details or variations. When additional information is desired, please contact your SPI representative.

Wall Mount Installation

1. Attach the universal mounting bracket to the junction box.

2. Make electrical connections per code.

3. Tightly secure lamp fixture backplate to wall using provided fixture mounting knurl nuts.

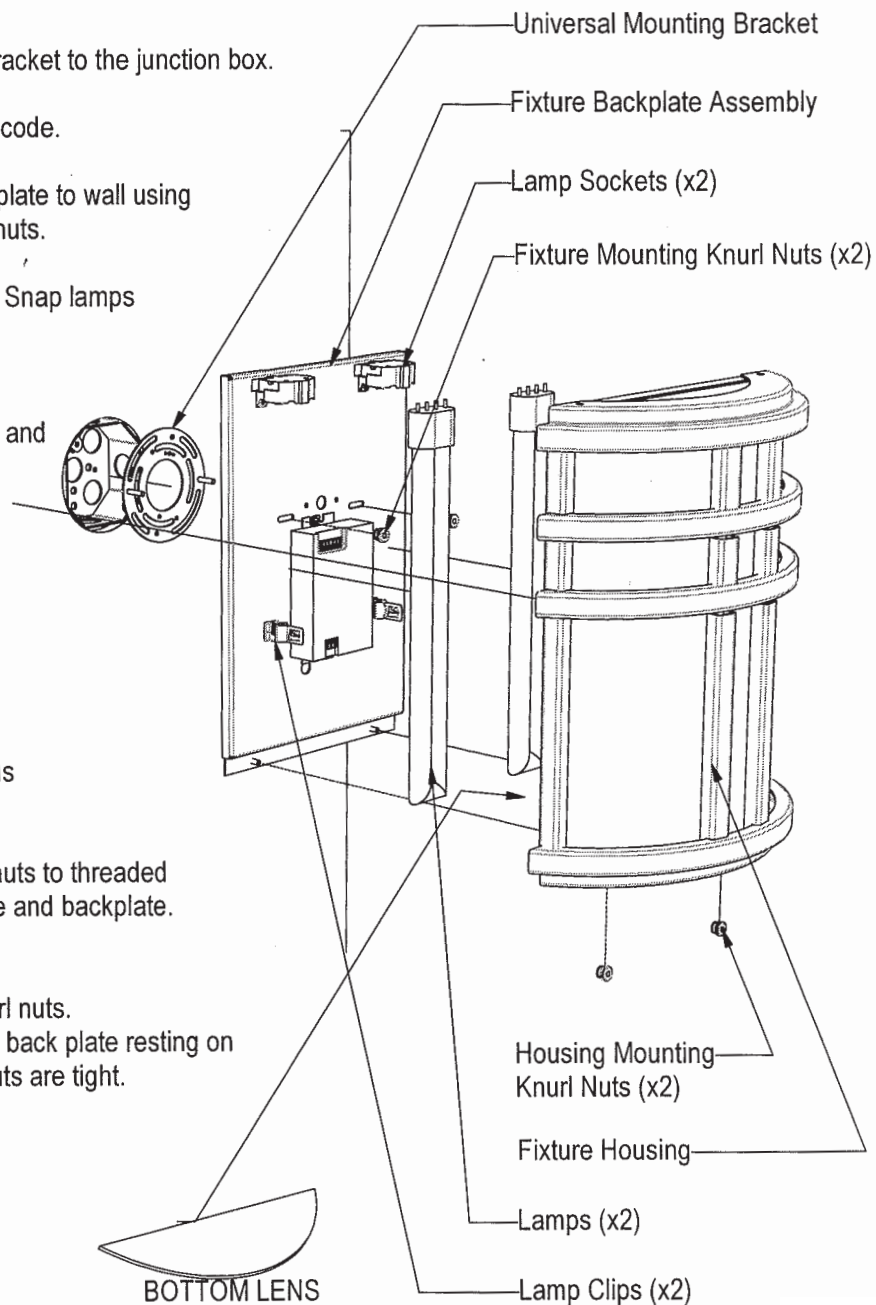

4. Install lamps into lamp sockets. Snap lamps into lamp clips.

4A. Bottom Lens Option:
Position bottom lens in housing and align to backplate.

5. Secure fixture housing to backplate by hooking the fixture housing into the slot on the top of the fixture backplate. Pivot fixture housing down into place.
Note: Two holes at the bottom of the fixture housing should slide over the two threaded studs from the fixture backplate.

6. Tightly secure remaining knurl nuts to threaded studs at the bottom of the fixture and backplate.

6A. Bottom Lens Option:
Move lens aside to access knurl nuts.
Re-position lens against fixture back plate resting on housing ring after knurl nuts are tight.
