DESCRIPTION

Lightruss is a unified, organized system for indirect lighting that lights large spaces better. Featuring efficacy over 100 lumens per watt and max output topping 80,000 lumens per fixture, it is a top choice for natatoriums, athletic facilities, and other high-ceiling applications. By lowering glare, indirect lighting improves visibility of lifeguards who need a clear view to the bottom of the pool. Spectators and swimmers can see better, too. It also gives designers the cleanest visual package because Lightruss lights from the perimeter and eliminates vertical stems. Tried and tested, this flagship family has more than 1,000 installations. For a complimentary lighting layout, contact our applications team at SPIteam@spilighting.com.

FEATURES & BENEFITS

- IP68 light engines, connectors and fully potted drivers stand up to harsh natatorium environments
- Modular part system allows for ease of maintenance
- System is pre-wired at the factory with time-saving male/female connectors for faster wiring and installation
- Tube structure allows for three separate raceways to give maximum flexibility in circuitry and other wiring
- Precision injection molded optics used for consistent performance from unit to unit
- Standard top lens corrects color-over-angle discoloration, delivering a clean white beam suitable for highly-finished ceilings and walls
- Back cover plate available for applications such as bleachers, cat walks and viewing areas
- Footcandle levels are capable of meeting many HD television requirements
- Optical performance allows for the creation of a fully indirect LED system equal to current 400W and 1000W Metal Halide (MH) Lightruss Systems
- Up to 40% energy savings with an indirect LED system when compared to an indirect Metal Halide (MH) system
- Handcrafted in USA

A - LIGHT SOURCE *

To ensure color consistency, SPI uses precise bin selection and strict quality processes to maintain a 3-step (MacAdam) SDCM on all white LED lampings. Published LED luminaire wattages are calculated using a typical power supply efficiency of 88%; exact wattages may vary based on application.
