# CUTTING-EDGE INDIRECT LIGHTING

Illuminate large spaces more comfortably with glare-free indirect light. Echo Blade is the slimmest, most discreet high output asymmetric lighting tool on the market.

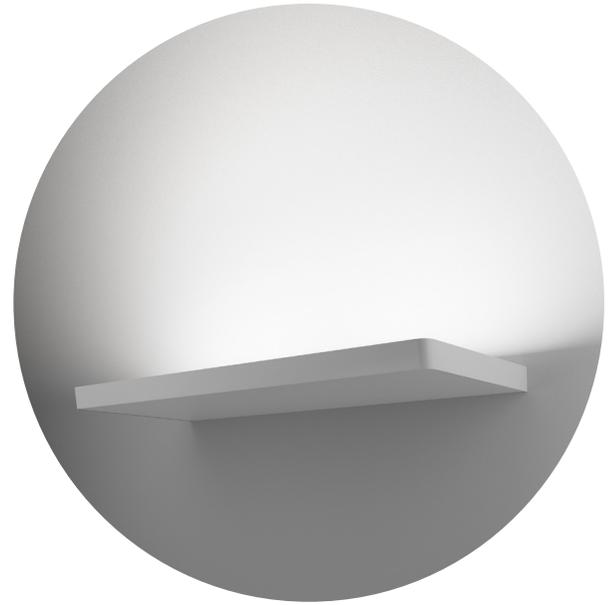

Combine high output density with outstanding light quality in a sleek architectural form that performs as great as it looks.

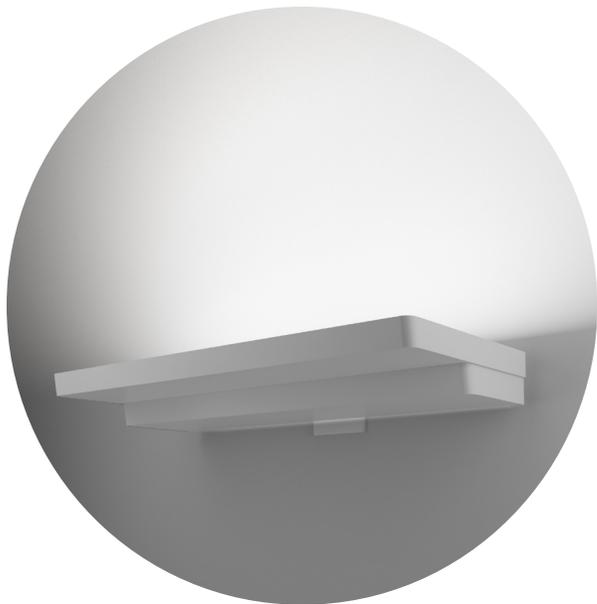

# A TRUE ASYMMETRIC

- Up to 112 lm/W
- Full horizontal cut-off
- Profile as slim as 1.5"
- Minimal projection from wall
- Interior & exterior versions

Catalog ID	Driver	Size	Wattage	Delivered Lumens*
EIW12179	remote	15.5"	108	12,107
EIW12180	integral			
EIW12181	remote	30.2"	216	24,214
EIW12182	integral			
EIW12183	remote	45"	324	36,320
EIW12184	integral			

*\*Delivered lumens are shown with Deep Asymmetric optical distribution.*

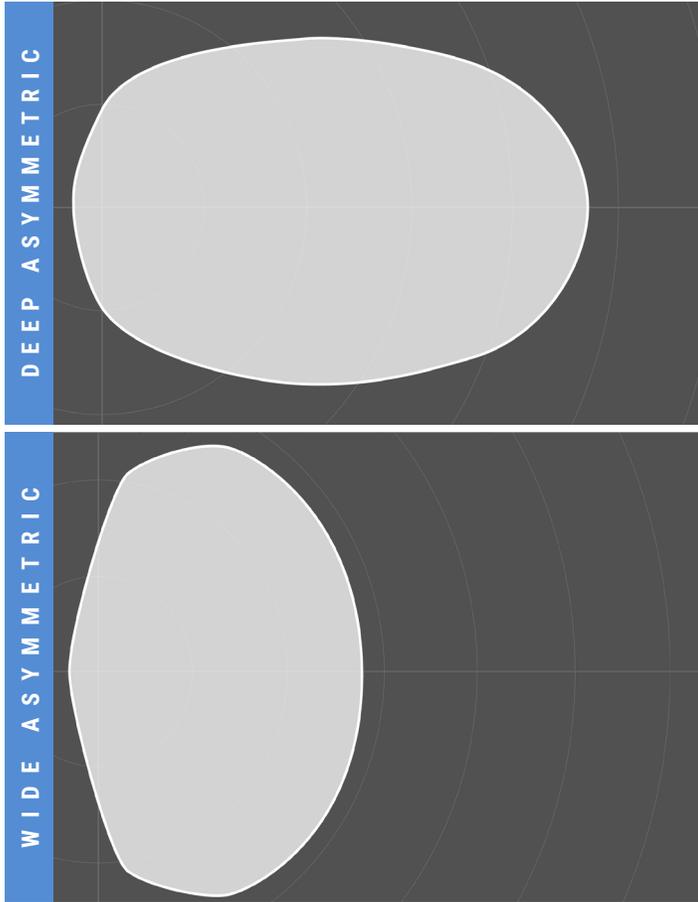

## WET LOCATION

- Up to 102 lm/W
- Full horizontal cut-off
- Profile as slim as 1.5"
- Minimal projection from wall
- IP66-rated

Catalog ID	Driver	Size	Wattage	Delivered Lumens*
EEW12171	integral	15.5"	108	10,994
EEW12172	integral	30.2"	216	21,989
EEW12173	integral	45"	324	32,983

*\*Delivered lumens are shown with Wide Asymmetric optical distribution.*

## IDEAL FOR LARGE SPACES

Expertly designed with advanced optics, Echo Blade effectively gets light where it's needed most—the middle of the room.

Choose from two asymmetric distributions. An optional [backlight shield](#) minimizes light spill onto the wall.

# THE BEST WAY TO LIGHT A NATATORIUM

Echo Blade is an excellent choice for pools where controlling glare is a top priority. Lighting the space indirectly improves visibility above and below the water.

Its robust construction ensures years of dependable performance in these humid and corrosive environments.
