SPI LIGHTING

www.spilighting.com

Echo Round 9.0 LED harnesses the latest technology to provide the lighting sophistication and superior comfort of indirect lighting.

Indirect asymmetric uplighting creates a luminous ceiling that comfortably lights a space while preventing direct view of the lighting source. This fixture is ideal for lobbies, atriums, athletic facilities, natatoriums, and recreational areas.

Features & benefits

- Highest output LED in its product category
- Provides an evenly-illuminated ceiling plane while eliminating direct source view
- Standard top lens corrects color-over-angle discoloration, delivering a clean white beam suitable for finished ceilings and walls
- Smallest projection from wall (10.1") of any product in its category (with integral driver)
- Rounded geometry blends naturally with architecture
- Excellent replacement for 250W or 400W indirect metal halide fixtures with up to 42% savings

Product overview:

Model Number	Total Wattage	Delivered Lumens	Length
EIW12150	127W	12,573	15.1 in
EIW12151	254W	25,146	26.8 in
EIW12152	380W	37,620	38.2 in

Also available in pendant mount.
