

NOVATO 2" FRAME

Designed with remarkable precision, Novato 2" Frame exhibits the purity and simplicity you seek in a basic geometric form. With three fully luminous sides, a seamless diffuser, and nearly invisible energized cables, Novato 2" Frame is the ultimate design tool in architectural lighting.

But don't feel like you need to sacrifice performance for beauty. This powerhouse delivers an incredible amount of light.

PURELY LUMINOUS

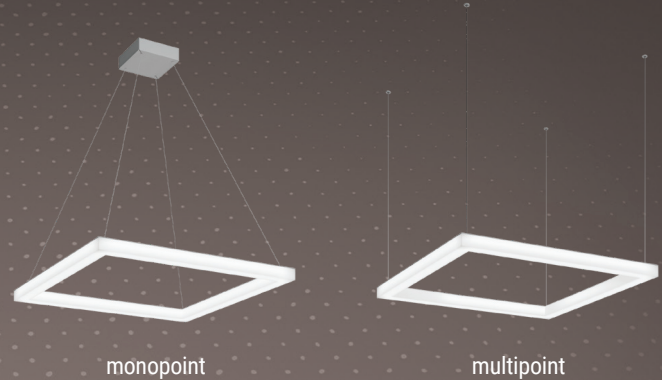

Novato 2" Frame is fully and evenly illuminated on three sides—giving you the purest light form to design with. Its unique construction broadens the light distribution and adds vertical illumination.

SHARP DESIGN DETAILS

Crafted by hand, the diffuser features crisp, mitered corners that are well-lit. A seamless diffuser provides a flawless finish that impresses from any angle. No detail has been overlooked.

A WEIGHTLESS FORM

Energized cables eliminate the need for a power cord and reduce ceiling clutter to provide weightless sophistication. Choose from monopoint or multipoint mounting options.
