NOTES:

DESCRIPTION

Designed with the timeless appeal of elementary geometry, Spheres is a modern revival of a classic form that symbolizes completeness, unity, and balance. Every point on its surface is equidistant from its center. Available in 18", 24", and 30" diameters.

FEATURES & BENEFITS

- White matte acrylic diffuser enhances a space with filtered, uniform illumination
- The double semi-sphere diffuser is joined together and then finished with an opal matte treatment to create a unified look to the globe
- The light engine is located at the center of the sphere, rather than the top, for the most even illumination
- Standard overall height of 48" allows designs to incorporate multiple sizes while maintaining a clearly defined lighting plane or vary OAH as desired
- Different sizes and mounting heights can be used to create visual arrays and three-dimensional collages
- All visible fasteners are flush mounted, providing a clean design
- Available in high and low wattages; both options are great for providing usable light while minimizing power consumption
- Handcrafted in USA

A - LIGHT SOURCE *

To ensure color consistency, SPI uses precise bin selection and strict quality processes to maintain a 3-step (MacAdam) SDCM on all white LED lampings. Published LED luminaire wattages are calculated using a typical power supply efficiency of 88%; exact wattages may vary based on application. White light engines are available in alternative wattages upon request. 80 CRI standard for RGBW products.
