A - LIGHT SOURCE *

To ensure color consistency, SPI uses precise bin selection and strict quality processes to maintain a 3-step (MacAdam) SDCM on all white LED lampings. Published LED luminaire wattages are calculated using a typical power supply efficiency of 88%; exact wattages may vary based on application. Published luminaire wattages are for fixtures with power cord or "zero length" energized cables. When choosing energized cables,

fixture wattages increase 2W per foot of OAH for low output and 5W per foot of OAH for high output. Voltage drop in energized cables reduces fixture efficacy; minimize OAH or choose an aircraft cable and power cord mounting to maximize efficacy. Alternative wattages available upon request.

F - MOUNTING *

MCE and BCE max distance to the driver (including OAH) is 15' for low output and 7' for high output. BCE and BCP max distance to the driver (including OAH) is: #18 AWG = 50', #16 AWG = 75', #14 AWG = 100'. For extended distances, contact factory. MCE, MCP and BCP mount to standard 4" octagonal junction box. BCP option includes standalone (independent of ceiling couplers) junction box cover. BCE option requires access above the ceiling and uses ceiling coupler (with cable gripper) to mount to electrically non-conductive structure above. Coupler mounts to ceiling using a 3/8" through hole with a maximum structure thickness of 1.25". Excess cable exits ceiling coupler above structure to be connected to Class II power lead (BCE). Field adjustable cables allow fixture to be mounted at an application appropriate height (up to OAH). Luminaire shown above features MCE mounting. Please choose one:

- ☐ MCE ² | 10" Monopoint Canopy with Power Supply & 4 Energized Cables
- ☐ MCP ² | 10" Monopoint Canopy with Power Supply & 4 Aircraft Cables with White Power Cord
- ☐ BCE ³ | 1/2" Button Canopy with 4 Straight Energized Cables, Remote Supply
- ☐ BCP ³ | 1/2" Button Canopy & 4 Straight Aircraft Cables with White Power Cord, Remote Supply

² Minimum OAH is half the diameter of the ring

³ Button canopy finished as machined aluminum and not painted to match housing

G - EMERGENCY

10W, Constant Power Battery Back-up, with 90 minutes of emergency operation. EMR includes damp location enclosure for Battery back-up.

- ☐ EMR | Emergency Battery Remote

H - OPTICAL DISTRIBUTION *

Choose DID option for 80% down/20% up distribution. Uplight slits with a matte opal diffuser added to top of housing, as shown below.

- ☐ DF_DIR | Direct (default)
- ☐ DID ⁴ | Direct / Indirect

⁴ Apply .83 multiplier for delivered lumens
