DESCRIPTION

This revolutionary modular system of luminous lines empowers you to create an infinite array of designs with ease, using all standard products. Get creative with crisp linear runs, precise angles, flowing curves, and sweeping elevation changes. There's no limit to what you can design with these architectural building blocks of light. Impeccably designed with continuous illumination, Novato 2" Lines + Arcs exhibits clean lines with no breaks in the light. Luminous on three sides, it adds dimension by broadening the distribution of light. Plus, efficacy surpasses 100 lumens per watt! For a complimentary lighting layout, contact our applications team at SPIteam@spilighting.com.

A - LIGHT SOURCE *

To ensure color consistency, SPI uses precise bin selection and strict quality processes to maintain a 3-step (MacAdam) SDCM on all white LED lampings. Published LED luminaire wattages are calculated using a typical power supply efficiency of 88%; exact wattages may vary based on application. Alternative wattages available upon request.

F - MOUNTING *

For mounting center information, go to https://www.spilighting.com/AIP12237 > Downloads > Install Sheets. Power drop canopy mounts to standard 4" octagonal junction box. Field adjustable aircraft cables allow fixture to be mounted at an application appropriate height (up to OAH). The aircraft ceiling coupler can be connected to the power drop canopy or can be separated from the power drop canopy to gain flexibility in mounting. See Downloads on website for mounting center measurements. Aircraft cable suspension uses ceiling coupler to mount to structure above. Coupler accepts 1/4-20 threaded rod or can be anchored using through hole (hardware by others). INSTALLATION NOTES: During installation, the contractor is responsible for using the actual fixtures to ensure accurate mounting centers from one fixture to the next along the length of the linear run. All ends of Connectors are joiners. Sections do not come with a power drops; see CPS12238 to order separately. Contact the factory for help determining how many drops your layout requires.
