A - LIGHT SOURCE *

To ensure color consistency, SPI uses precise bin selection and strict quality processes to maintain a 3-step (MacAdam) SDCM on all white LED lampings. Published LED luminaire wattages are calculated using a typical power supply efficiency of 88%; exact wattages may vary based on application. Alternative wattages available upon request.

F - MOUNTING *

For mounting center information, go to https://www.spilighting.com/AIP12255 > Downloads > Install Sheets. Power drop canopy mounts to standard 4" octagonal junction box. Field adjustable aircraft cables allow fixture to be mounted at an application appropriate height (up to OAH). The aircraft ceiling coupler can be connected to the power drop canopy or can be separated from the power drop canopy to gain flexibility in mounting. See Downloads on website for mounting center measurements. Aircraft cable suspension uses ceiling coupler to mount to structure above. Coupler accepts 1/4-20 threaded rod or can be anchored using through hole (hardware by others). INSTALLATION NOTES: During installation, the contractor is responsible for using the actual fixtures to ensure accurate mounting centers from one fixture to the next along the length of the linear run.

☐ DF_AC | Aircraft Cable (default)

G - EMERGENCY

EMR is provided with a remote 10W, constant power battery back-up, for 90 Minutes of emergency operation, in a damp listed enclosure. EMC option if for direct connection to alternate emergency circuit (EM power By Others). All EM options in common section are provided with pass through wiring for normal power circuit within the configuration.
