DESCRIPTION

Echo Blade is the slimmest, most discreet high output asymmetric lighting tool on the market. It combines high output density with outstanding quality in a sleek, new architectural form that performs as great as it looks. With a profile of just 1.5", SPI Lighting's Echo Blade can deliver from 12,000 to 36,000 lumens. Available in either a deep forward throw or a wide distribution, it is ideal for illuminating large spaces with comfortable, glare-free light. For a complimentary lighting layout, contact our applications team at SPIteam@spilighting.com.

A - LIGHT SOURCE *

To ensure color consistency, SPI uses precise bin selection and strict quality processes to maintain a 3-step (MacAdam) SDCM on all white LED lampings. Published LED luminaire wattages are calculated using a typical power supply efficiency of 88%; exact wattages may vary based on

application. Delivered lumens shown are with the Deep Asymmetric (DA) optical package; apply multiplier for alternate distributions.

H - OPTICAL DISTRIBUTION *

The Deep Asymmetric beam is commonly used in larger spaces to get more light to the center of the room. The Wide Asymmetric beam provides more even illumination in smaller spaces and allows for greater fixture spacing. The backlight shield reduces the appearance of hot spots on walls. Contact factory for applications support.
